“Life and Ecology Sciences – Entrepreneurship under Development of Cross Border Cooperation“

**November 19th, 2010
Klaipėda University, Lithuania**

Dear _____,

On 19th of November, 2010, the University of Klaipėda will hold an international meeting “Life and Ecology Sciences – Entrepreneurship under Development of Cross Border Cooperation“

We would like to cordially invite you to attend the above mentioned meeting aimed to promulgate information about the project Eco4Life as well as perspectives for cooperation in creating a prosperous future in the Baltic Sea Region.

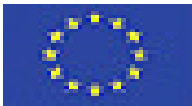

The project “Eco4Life-South Baltic Network for Environmental and Life Sciences to Boost Cross Border Cooperation” (<http://eco4life.info>) will network and bundle competencies in environmental and Life Sciences in the coastal regions of Mecklenburg-Vorpommern, the West Pomeranian Voivodeship and the Klaipėda County. Contact points will be established in each of the regions to build up a regional network and realise vivid cross border cooperation to strengthen entrepreneurship and economy in the South Baltic region.

The meeting will present the idea of the project, the project partners and the concrete activities to realise a strong regional and international network between science, economy and administrative bodies. This so called “triple helix” approach will serve the prerequisites to stimulate cross border cooperation and boost the development of young and successful companies in the regions.

We sincerely hope that you will be able to take an advantage to meet and exchange ideas with participants.

We look forward to seeing you in Klaipėda

Klaipėda University
Vice Rector for Research prof. A. Ramonas
